

## The Equipment We Use

### Sound

We only use the best brand name equipment available from our sources! We use Numark turntable style CD Players, Numark Digital MP3 Players, Denon Mixers, BBE Sonic Maximizers, DBX Equalizers, Compressors & Limiters, QSC Amplifiers and JBL Speakers! We also use Shure wireless systems along with Shure microphones, and SKB podiums and cases. And we have backup equipment from all the same brands! We use Livewire, Whirlwind, Monster Cable and some Radio Shack cables for our cabling.

### Lighting

Although lighting is not included with every package we offer automatically, you can always add it to any package for just \$100. If you really want to enhance the dance floor you can even add twice the lighting for only \$200. We only use professional lighting effects by companies that are well known in the industry. Some of the lights we have available for example are, a Disco Ball and Pin Spots. Faster more active lights like Vertigo's by American DJ and the Elan by Chauvet. An incredible laser called a Scorpion by Chauvet. These are some of the types of lighting we have to offer. We will be happy to work with you to customize the light show to your needs.

### Other equipment we available for an additional cost:

- A Haze Machine to enhance the lights or for your grand entrance for only \$25
- A Second Sound System for filling in secondary areas or the backs of big rooms only \$200
- A full Live PA System for a live band or multiple performers, including line level mixer and up to 4 microphones and stands for only \$100. (Integrate all performers into one sound system)
